Global Project Cargo Expertise

Your logistics plan will be customized for your unique project needs—from a comprehensive, pre-shipment evaluation of potential risks, costs and delivery schedules, to route and port surveys, coordination of proper packaging of components, required documentation handling, and transportation mode analysis. Every shipment is coordinated with tailored plans, and even the most demanding projects are executed with care and precision. However challenging the geography, however complex the lift, our project cargo experts work closely with engineers and contractors to ensure that every project is planned, delivered and completed on-time and to exact specifications.

Just a few examples of the projects we have handled:

- Transported locomotives to Indonesia
- Imported solar modules into the U.S.
- Shipped wind turbines to Finland
- Hauled tugboats to Kuwait
- Moved liquid natural gas tanks to Brazil
- Delivered four 2-million-pound gas tanks to the U.S.

We Manage Your Project From Start To Finish

The BIG, the BAD, and the UGLY

Logistics Plus® has over 25 years of project cargo expertise. We find creative ways to manage the big, the bad, and the ugly. Break bulk, heavy-lift, oversized, over-dimensional, and out of gauge (OOG) – we manage it all!

We Put The “+” In Project Cargo Logistics

Project cargo, project forwarding, heavy lift – call it what you will. Our project cargo specialists have managed big and unique cargo freight projects around the world. The examples below illustrate recent cargo projects we have handled. Visit us today at www.logisticsplus.com/projectcargo if you're ready for us to manage your project too.

THE
BIG
THE
BAD
AND THE
UGLY
