Our client-facing web portal that's integrated with CargoWise One to provide real-time global shipment quoting, cargo tracking, warehousing, and more.

Custom-built mobile warehousing and transportation app for iPhone and Android.

Our proprietary North American transportation management system (TMS) with user-friendly for quoting, tracking, booking, and embedded MyFreightTrends™ dashboards.

Seamlessly integrated eCommerce pick, pack and ship fulfillment capabilities, powered by VeraCore®.

Customized, turnkey management system for Furniture, Fixtures & Equipment.

# BUSINESS INTELLIGENCE SOLUTIONS

## END TO END SUPPLY CHAIN VISIBILITY

Logistics Plus® offers a full suite of user-friendly BI tools that are reflective of specific customer requirements.

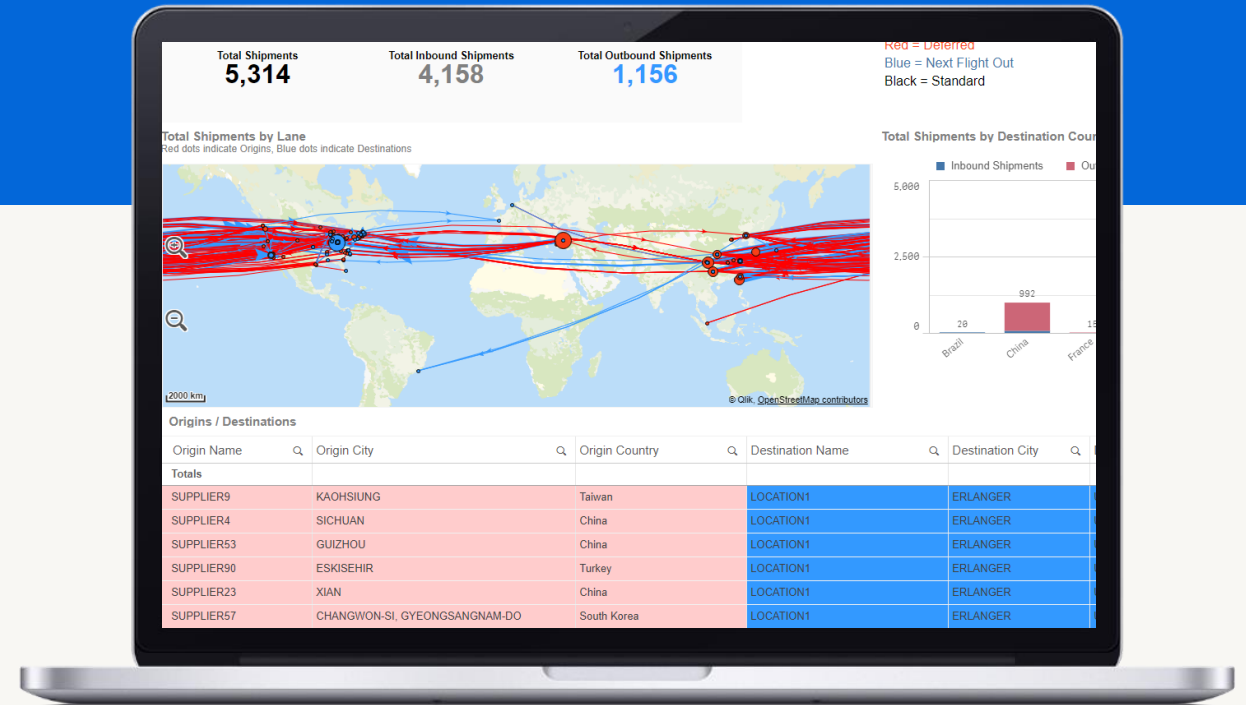

Our custom **analytic solutions** cater to the exact specifications and requirements of our clients rather than having a standard “out of the box” solution.

By using **predictive analytics**, we help businesses budget and plan by utilizing existing data to forecast and anticipate future events.

Our **custom reporting** abilities begin with raw data and end with digestible, useful information to help our clients to find savings opportunities.

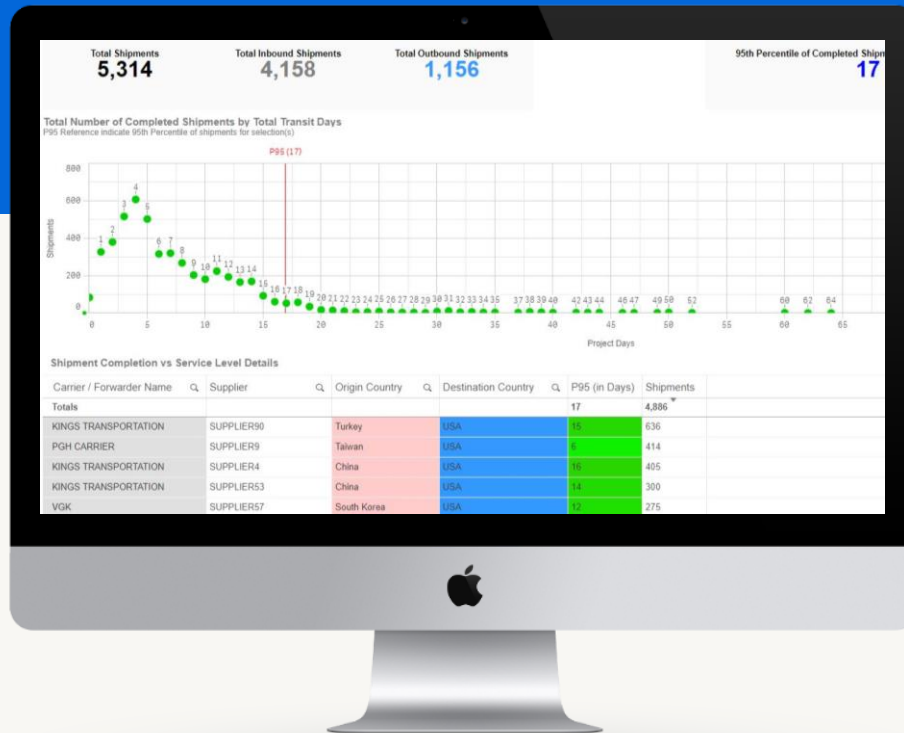

# CONTROL TOWER CAPABILITIES

## CAPTURING DATA POINTS ACROSS THE GLOBE

By tracking milestones and the progress of each shipment, we can identify specific pain points in a supply chain.

Logistics Plus captures data points regarding the physical movement of shipments across the globe. Our control tower capabilities find the root cause of supply chain disruptions so our clients can readjust their expectations or change their processes in a specific country.

By offering the flexibility of tracking one unique shipment, or analyzing multiple shipments on an aggregate level, our control tower capabilities allow our customers to gain a better perspective on all shipment activities.
